

# RSB Rotation Stage

UHV Rotation Stage

Ultra-high vacuum compatible rotation stages intended for intermittent rotation of balanced loads or as a precision gearbox.

Manufactured with UHV compatible material and construction methods and featuring a preloaded worm drive for zero backlash, continuous rotation range and AML D35.1 UHV stepper motors.

## SPECIFICATIONS

Model	RSB10K	RSB20K	RSB30K	RSB90K
Resolution range	360°			
Resolution in full steps	0.036°	0.018°	0.012°	0.004°
Steps per revolution	10,000	20,000	30,000	90,000
Maximum loaded speed	1 kHz 1 sec/rev	1 kHz 20 sec/rev	1 kHz 30 sec/rev	2 kHz 45 sec/rev
Centred load capacity (Normal)	1 kg			
Backlash (Unloaded)	0.04°			
Vacuum	$1 \times 10^{-10}$			
Maximum temperature	200 °C			
Motor	D35.1			
Mass including motor	640 g	710 g	710 g	940 g

As standard CRS rotational stages are supplied lubricated with Nyetorr® 6300 low-vapour pressure ( $6 \times 10^{-12}$  mbar) grease. Dry lubrication with molybdenum disulfide is available as an alternative option but this will reduce the expected life of the worm wheel.
